REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Re claims 1-16, the method of making of stator assembly including the step of substantially encapsulating the toroidal core and windings with a monolithic body of phase change material wherein the monolithic body of phase change material being the sole structure functioning to secure the core preform in the shape of the toroidal core, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Re claims 17-19, 26, 31 and 32, the method of making of motor including the steps of clamping the toroidal core in an injection mold cavity with the mold holding the core preform in the toroidal shape and bringing the two end surfaces into contact with each other and injecting molding phase change material around the toroidal core to substantially encapsulate the toroidal core with a monolithic body of phase change material to form the stator assembly wherein the monolithic body of phase change material structurally functions to secure the core preform in the toroidal shape after the stator assembly is released from the mold, are neither disclosed nor taught by the prior art of record.

Re claims 27-30, the method of making of stator assembly including the step of substantially encapsulating the toroidal core and windings with a monolithic body of phase change material to form the stator assembly wherein the monolithic body of phase change material having a tensile strength of at least about 7,600 psi when tested under ASTM test method D638 and holding the core preform in a toroidal shape, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
